

MD-03K-JP

LIGHT DUTY JOINT PLAY TESTER

The MD-03K-JP light duty joint play tester is designed for visual inspections of the mechanical condition of axle components on light duty vehicles. The stub axles, steering pivot points, suspension, hinge points and bearings all can be inspected while 2 hydraulic rams induce 45° movements.

Features:

- Hand held pendant with flashlight and built in controls
- High friction wheel surface
- 2 hydraulic rams induce 45 degree movements required for transverse and longitudinal play

Type: Hydraulic Plates (2)

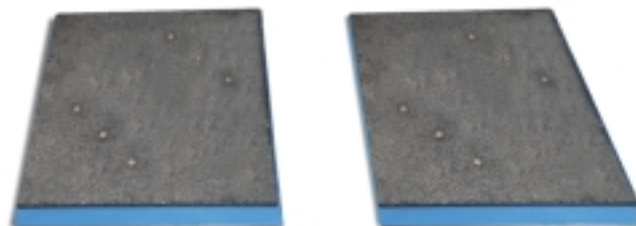

Maximum Axle Load: 2,500 kg / 5,513 lbs

Specifications

Thrust Force: 1,000 daN
Power of Motor: 0.55 Kw / .75 hp
Operating Pressure: 70 bars / 1,015 psi
Longitudinal / Transversal Travel: 35 mm / 1.38 in
45 Degree Movement: 50 mm / 1.97 in
Maximum Pressure: 110 bars / 1,595 psi

Power Requirements: 220 / 380 three phase, 60 Hz, 5 Amps

Mounting Configuration: Inspection Pit or Scissor Lift
